

Age UK find excellent support from CSL

Age UK is the country's largest charity dedicated to helping everyone make the most of later life. They believe in a world where everyone can love later life and they work every day to achieve this. They help more than 7m people every year, providing companionship, advice and support for older people who need it most.

Age UK had experienced difficulties with their previous supplier and required additional expertise when making the important decision on their new fleet of devices. CSL were chosen as the preferred supplier after they provided excellent referral sites and references from other charities they have been looking after in the area.

Since we chose CSL, we've been delighted with both the hardware and their service support

Mick Tinkler, Age UK Notts
